

TEA

Introduction

TEA Publishers is one of the oldest publishing houses in Estonia. TEA started its business producing high quality language learning materials and dictionaries, and has remained faithful to its core business to this day. The portfolio expanded by launching children's non-fiction titles about five years ago. The most recent step forward has been the launch of the national encyclopaedia in 22 volumes and the online encyclopaedia to be completed by 2014.

This catalogue provides the opportunity to see the wide range of languages covered by our dictionaries, and also showcases the ever expanding range of formats in which they are produced; from the handy pocket versions for travellers and the series of school dictionaries to the specialised, medium-sized and large dictionaries, most of which are accompanied by CD-ROMs. The newest titles among dictionaries are Basic Estonian-English Dictionary for Learners of Estonia, Dictionary of Foreign Words in a handy mini-format and on CD-ROM, both launched to celebrate the 10th publication year of one of our bestselling titles.

This catalogue also presents TEA's most advanced language learning materials where traditional textbook materials and exercises are skilfully combined with audio-lessons, vocabulary training and multimedia clips, all supported by clear and concise teacher's guides and self-study tips. We are proud to present our newest title called "Saame tuttavaks!", an Estonian language textbook for beginners, which is an absolute must for those who would like to give this language a good start. The book is accompanied by audio-CDs, and soon a fully interactive e-book will be launched.

Last but not least, TEA's portfolio includes reference books, which are carefully selected from the catalogues of our chosen partners in Europe and beyond, and then professionally and carefully translated. This catalogue gives a short overview of some of the most successful titles, and highlights the growing influence of TEA's own original reference materials.

An important development was the purchase of Ilo Publishers in order to join the forces and extend our market share. Ilo has been a well-known reference and phrase-book publisher together with language learning and pre-school materials for 20 years.

You are welcome to search for and buy rights to our most advanced and top-selling titles from this catalogue of TEA dictionaries, language learning and reference publications.
